FREW & CAMPBELL

Billes: Nos. 25 and 27 Fourteenth Street THURSDAY MORNING, MARCH 17.

SENATOR-KLECT McDILL, of Iowa, is also an Obio man, and was admitted to the bar

SENATOR VEST, of Missouri, has just written a letter bossting that no Democratic State has a prohibitory law and that no Democratic State ever enacted one.

THE Indiana House has voted reporters the privilege of attending prize fights on the ground that it is necessary that the public be kept informed of all violations of law.

JUDGE Woods, of the Supreme Court, has decided that the Texas statute forbidding marriages between the races is untitutional, being repugnant to the 14th

THE bill to remove restriction on suffraze in the State of New York based on sex was reported in the assembly at Albany yesterday for the consideration of the House. This is to allow women to vote at all elections.

SENATOR BAYARD has written to the Delaware Legislature advising against any prohibitionary legislation on the ground that it is antagonistic to Democracy which permits man to eat and drink ac cording to his own inclination.

GARFIELD, in taking the cath of office Eissed the open Bible at the 21st chapter of Proverbs, where it reads: "Every way of a man is right in his own eyes, but the Lord pondereth the heart. To do justice and judgment is more acceptable to the Lord than sacrifices."

THE Indiana House made a disgraceful exhibition of itself at the close of the regular session the other day. A bill to provide a bounty for killing owls, hawks and other birds that trouble poultry was up, and brought out all sorts of amendments some of them obscene enough to drive women out of the hall. Paper wads and books were also thrown about, and perfect pandemonium reigned for half an

"Much of the prejudice now existing against railroad companies in the minds of the people, and even in the minds of such great men as Judge Black," says Mr. Albert Fink, "is caused by the failure to investigate facts and by irrational and illogical methods of reasoning and generalization. Without much reflection it is generally assumed that if in one single transaction out of a thousand a railroad company is guilty of making an extortionate charge, it must also be guilty in the nine hundred and ninety-nine others; and if one railroad company is guilty all others in the country must be equally

CHICAGO dispatches say the story of the consolidation of the North Western, St. Paul and Northern Pacific railroads, how-ever plausible, finds little credence among railroad men, and it is absolutely denied by the officials of the roads in question. S. S. Werrill, president of the Milwaukee & St. Paul railroad, says there is no truth in the recent statement of a correspondent that the North Western road had secured control of the only entrance to the Black Hills. Mr. Werrill says there are two or three other available gate ways to the Hills, and that this road is in no danger of being shut out by the enterprise of its active competitors.

A NEW source of immigration to this country has been found in Italy. Heretofore the Italians emigrating hither form ed no considerable portion of the additions to our population, but latterly the cable has brought the news that Italians are preparing to seek a residence under Western skies in large bodies. By midsummer it is believed many thousands will be on this side or on the road hither. Cannot something be done to stay a portion of the westward tide within the borders of West Virginia? The rural classes of Italy would make a very desirable addition to our people. They are a happy, contented race, and under the stimulus o our mountain air would become industrione and useful citizens. THE new Emperor of Russia, Alexander

Alexandrovitch, has proclaimed his accession under the official title of Alexander the Third. The Emperor may congratulate himself upon the fact that Alexander the Great, of Macedon and Asia, was also officially Alexander the Third. The name, however, is not an auspicious one in the family of the Remanoffs. Alexander the First (Paulovitch) came to the throne in 1801 in consequence of the assassination of his father, and Alexander II, (Nichola covith.) it has been repeated, acceded when he did in consequence of his predecessor's suicide. The Emperor, who has proclaimed himself and his heir ap parent at the same time, was thirty-size years old last Thursday, and is understood to have both a will and a policy of his own. He became heir to the throne in 1865, upon the death of his elder brother, Nicholas Alexandrovitch, whose betrothed, the Princess Dagmar of Denmark, he made his bride.

VANDERBILT and Gould excuse the late consolidation of the telegraph companies on the plea that the company is now enabled to send messages at lower rates than when the lines acted separately. The New York Board of Trade has been looking up statistics and presents records to show that as far back as 1852 telegraphing was done at less rates per message than i is to-day! The cost of constructing and operating telegraphs has decreased 75 per cent. since 1852, but the rates have in-creased 100 per cent. Every increase of capital stock has been made a pretext for running up rates, and to-day they are far in excess of the legitimate investment or cost of operating the wires. It is the policy of exacting enormous percentage on fancy issues of stock that makes telegraphing more expensive than any other branch of business of a similar nature. The im provements and invention of the last ten years have made telegraphy 100 per cent cheaper in Europe.

The secret of recruiting the vital principle is discovered in Tut's Pills. In Liver Affections, Disziness. Headache, Costiveness, Dyspepeis, Fevers of all kinds, Dysentery, Flatuence, Hearthurn, Emptions of the Skin, Nervoueness, Billious Colic, Loss of Appetite and all troubles of the bowels their curative effects are marvellous. They are truly the afflicted's friend.

A youngster steps up to gentleman in the park: "Sir, won't you please go after my boat, which is going to fall into the stream?" "But do you wish me to throw myself into the water, child?" "Oh, yes, mamma said, 'ask that gentleman; he looks fool enough to do it."

There are a good many things in this world to make a man mad. The young man who kindly stopped to assist a blind man afterwards found that the girl who was looking at him from the window of the house was the housemaid, and not the daughter and heiress of the proprietor.

A Stone Ridge farmer lost a goose. Two weeks afterwards he happened to visit a neighboring saw-mill. While there he heard a goose and started in pursuit. After a long sbarch, guided by the noise, he came to a hole in the ground, and looking came to a hole in the ground, and looking down he saw the head and part of the nock of his bird. It appeared the goose had fallen into the hole, which, being too amall to allow of a spread of its wings, the poor bird could not fly out. While kepta prisoner thus the snow had melted and run into the hole. As fast as it reached the bottom of the hole away from the sun it had frozen, and it had continued to freeze until the entire bird, with the exception of its head and about two inches of its neck, was encased in an armor of ception of its head and about two inches of its neck, was encased in an armor of icc. The owner procured an ax and cut out chunk of ice, gooze and all, which he deposited on the ground, and picked away until the goose was released from its confinement, and marched home in search of its first meal for two weeks.
